

Section 208 Area Wide Water Quality Management Plan Monitoring Subcommittee

Membership: DEP, EPA, Provincetown Center, WBNERR, Town Rep, Academics, Institution/Agency

Staff: Tom Cambareri

Mission: To provide advice and guidance on appropriate monitoring protocols for technology efficiency and total maximum daily loads, while identifying a process for consolidating all available monitoring data in a central location and format.

Roles and Responsibilities:

- Establish performance monitoring protocols for technologies that may be a part of watershed permits in the future
- Establish compliance monitoring protocols for meeting total maximum daily loads (TMDLs) in the water body
- Establish process and structure for consolidating and cooperation of existing monitoring programs and data in to a centralized location
- Identify region-wide monitoring needs and develop proposals
