

# Wellfleet: 1970-2013

- Appropriation
- Regulatory/Town Meeting Action
- Report/Study
- Infrastructure/Plan Implementation
- Negative Vote/ Stopped Action
- Section 208 Update Stakeholder Process

## From Cape Cod's 1978 Section 208 Plan

The 1978 Section 208 Plan was drafted by the Cape Cod Planning and Economic Development Council.

These are some of the key recommendations as published in 1978.

- ▶ The Town of Wellfleet is similar to Eastham and Truro in that it has a high influx of summer population and has no municipal water or sewer system.
- ▶ Wellfleet has a relatively densely populated downtown area which is indicated in the Wastewater Problem Areas Map
- ▶ It is recommended that the town regionalize with Truro for construction of a septage facility.
- ▶ Since Wellfleet has a major Category 2 problem area it would be the most appropriate town to be a lead agency and conduct a full 201 facility plan.
- ▶ On-site system installation and management should be administered by a professional health agent.
- ▶ Wellfleet should join with either Eastham or Truro and apply for state funds for a shared health agent.
- ▶ There's an immediate need for a public water supply in Wellfleet Center.
- ▶ Since Wellfleet is one of the few Cape Cod towns which has no water supply engineering plan, a combined water and sewer study would be desirable.
- ▶ The town planning board is presently revising its master plan. Water quality should be a priority consideration, and should be coordinated through the establishment of a water quality advisory committee.
