## Comment

To whom it may concern, I’m a resident in Bourne and have concerns about that expansion of the Cape Cod gas pipeline. I’m most concerned about our neighbors living near the gas expulsion sights. Our neighbors do not deserve negative health outcomes, the constant smell of gas, nor the added noise from these larger sights. The lack of consideration for not only our own but for the states promise to hit lower carbon emissions. We cannot continue to rely on dwindling fossil fuels and should be spending the time and money on more sustainable energy sources.
