To the Cape Cod Commission:

My wife and I have thoroughly researched the "Algonquin Pipeline Relocation - 25012 Bourne Project. We look forward to replacement of both bridges as expediciously as possibe; however, we ~~fully~~ agree with the Sierra Clubs analysis, specifying that AGT's project is a pipeline expansion, not just a relocation.

The Cape Cod Commission should: (1) Ensure the pipeline does not expand gas capacity and doesn't get in the way of the region's and State greehouse emission reduction goals, (2) require AGT doesn't exploit additional capacity as a condition of approval, (3) Explore opportunities to phase out gas with the Bourne Bridge replacement funding not yet secured.

Thanks for your consideration,

Ted Mogilnicki

Janet Mogilnicki
