Although I clicked on the "Algonquin Pipeline Relocation" project, my understanding is that that is an incorrect name for the project. It is not just a "relocation" but an "expansion." Although I am not a scientist, I am a thoughtful citizen who tries to stay well-informed. The information that I have read about this project has given me serious reservations about the long-term negative consequences of expanding the pipeline as proposed. I am counting on you to protect the quality of life on the Cape by preventing this expansion.
