Comment

I oppose the current plan which includes expansion, rather than simply relocation, of the Algonquin Pipeline. It would exploit taxpayer's by inappropriately using state and federal funds to expand the capacity to bring gas onto Cape Cod. We have created goals to reduce fossil fuel use in favor of sustainable sources of energy. We don't need more gas, we need more solar and wind power. Please step up to use this opportunity to uphold and enforce the sentiments expressed in the Regional Policy Plan and the Climate Action Plan that the Commission has initiated and supported.
